

Outdoor Cooking Equipment

BBQ grills, either electric or fueled are not allowed to be used or stored in the building or on building balconies.

They may be stored in garage buildings that are not connected to residential structures.

Equipment must be at least 15 feet from structures and any other combustible materials.

A portable fire extinguisher with a minimum 4-A rating, or alternative means of extinguishment such as a working garden hose, must be in place for immediate use.

Fires emitting smoke or ash that may be harmful to surrounding property owners, or when atmospheric conditions or local circumstances make such fires hazardous, will be required to be extinguished.
